

## Network Security

Real world security for network management

**TestSource** delivers Network Security products from industry leaders:

# Apani

Algorithmic Security Inc.

**TestSource** delivers a range of security products to deal with the day-to-day security issues network managers face, including:

### Responding to threats

**Enira's** Network Response System responds to, commands and controls network threats and attacks. Advanced technology provides a defined, reliable course of action to rapidly quarantine any cyber-security incident safely, effectively and intelligently.

### Protecting data

**Apani's** EpiForce encrypts and protects data-in-motion within the network perimeter. It also provides a network security compliance management tool that automatically configures and updates each of your security policies so you don't have to.

### Minimizing risk, ensuring compliance

**AlgoSec** Firewall Analyzer identifies firewall policies that compromise security so you can ensure policy effectiveness and compliance and ease audits.
